Graduating Class of 2013 Information

Under the direction of the leadership of the Neag School Assessment Committee, in April, the first School-wide Common Exit Survey was completed by 306 students who graduated in May 2013. The first of three purposes of this survey was to obtain contact information for all graduates. This included email and alternate emails, home and cell phone numbers, addresses, additional contacts (names, emails, and phone numbers), and employment information. Also, three questions were posed with yes/no responses: Do you wish to obtain information from Neag School of Education? Would you like information about job opportunities? Would you like information about training opportunities?

Contact information on these graduates can now be requested from the Office of Assessment or support staff from the respective departments and the Teacher Education office. The only restriction is that the use of this information is for school-related activities. (Research-type uses need to follow the respective guidelines have been developed by the Neag School Assessment Committee.)
